Re: WHWH (AM), Princeton, New Jersey  
Facility Identification Number: 47426  
Multicultural Radio Broadcasting Licensee, LLC  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed March 15, 2011, on behalf of Multicultural Radio Broadcasting Licensee, LLC ("MRB").<sup>1</sup> MRB requests further extension of the special temporary authority ("STA") granted on February 24, 2010, for operation of Station WHWH during nighttime hours with parameters at variance and/or reduced power while maintaining monitor points within licensed limits, and with a nondirectional antenna and reduced power. In support of the request, MRB states that its engineer continues to analyze the problem with the nighttime directional antenna system.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

---

<sup>1</sup> Station WHWH is licensed for operation on 1350 kHz with 5 kilowatts, unlimited hours, employing different directional patterns during daytime and nighttime hours (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WHWH may operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Operation with an emergency nondirectional antenna and reduced power not to exceed 1.25 kilowatts also is authorized, only as necessary to facilitate restoration of licensed operation. It will be necessary to further reduce power or cease operation if complaints of interference are received. MRB must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **November 13, 2011**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
